Protect Your Heirs by Naming a Trust as IRA Beneficiary

Marriage and Money: Taking a Team Approach to Retirement

I received a large refund on my tax return this year. Should I adjust my withholding?

What is the difference between a tax deduction and a tax credit?

# Focus on Financial Freedom

## *Maintaining Your Financial Health*

### Pick Your Plastic: Debit or Credit?

According to a Federal Reserve study, Americans use debit cards more often than credit cards, but the total value and the average value of credit card transactions are higher than those of debit card transactions.

While consumers made 69.5 billion transactions using debit cards, the total value of these transactions was \$2.56 trillion, with an average transaction value of \$37. Credit card usage resulted in 33.8 billion transactions, with a total value of \$3.16 trillion, and a \$93 average transaction value.<sup>1</sup>

This reflects fundamental differences. A debit card acts like a plastic check and draws directly from your checking account, whereas a credit card transaction is a loan that remains interest-free only if you pay your monthly bill on time. For this reason, people may use a debit card for regular expenses and a credit card for "extras." However, when deciding which card to use, you should be aware of other differences.

#### Fraud protection

In general, you are liable for no more than \$50 in fraudulent credit card charges. For debit cards, a \$50 limit applies only if a lost card or PIN is reported within 48 hours. The limit is \$500 if reported within 60 days, with unlimited liability after that. A credit card may be safer in higher-risk situations, such as when shopping online, when the card will leave your sight in a restaurant, or when you are concerned about a card reader. If you regularly use a debit card in these situations, you may want to maintain a lower checking balance and keep most of your funds in savings.

#### Merchant disputes

You can dispute a credit card charge before paying your bill and shouldn't have to pay it while the charge is under dispute. Disputing a debit card charge can be more difficult when

the charge has been deducted from your account, and it may take some time before the funds are returned.

#### Rewards and extra benefits

Debit cards offer little or no additional benefits, while some credit cards offer cash-back rewards, and major cards typically include extra benefits such as travel insurance, extended warranties, and secondary collision and theft coverage for rental cars (up to policy limits). Of course, if you do not pay your credit card bill in full each month, the interest you pay can outweigh any financial rewards.

#### Credit history

Using a credit card responsibly can help you build a positive credit history because your usage is reported to credit reporting agencies. A debit card has no effect on your credit.

#### Money management

Using a debit card helps ensure that you don't overspend. Because purchases are deducted right away from your checking account, you aren't in the dark about how much you're spending. You can quickly check your balance online or at an ATM, and see which purchases are pending.

A credit card offers you the flexibility of tracking your monthly expenses on one bill, which can help you establish and stick to a realistic budget. A credit card can also be used in emergencies.

Considering the additional protections and benefits, a credit card may be a better choice in some situations — but only if you pay your monthly bill on time. The good news is, you don't have to choose just one option.

## Protect Your Heirs by Naming a Trust as IRA Beneficiary

While trusts offer numerous advantages, they incur up-front costs and often have ongoing administrative fees. The use of trusts involves a complex web of tax rules and regulations. You should consider the counsel of an experienced estate planning professional and your legal and tax advisers before implementing such strategies.

Often, tax-qualified retirement accounts such as IRAs make up a significant part of one's estate. Naming beneficiaries of an IRA can be an important part of an estate plan. One option is designating a trust as the IRA beneficiary.

**Caution:** This discussion applies to traditional IRAs, not to Roth IRAs. Special considerations apply to beneficiary designations for Roth IRAs.

### Why use a trust?

Here are the most common reasons for designating a trust as an IRA beneficiary:

- Generally, inherited IRAs are not protected from the IRA beneficiary's creditors. However, IRA funds left to a properly drafted trust may offer considerable protection against the creditors of trust beneficiaries.
- When you designate one or more individuals as beneficiary of your IRA, those beneficiaries are generally free to do whatever they want with the inherited IRA funds, after your death. But if you set up a trust for the benefit of your intended beneficiaries and name that trust as beneficiary of your IRA, you can retain some control over the funds after your death. Your intended beneficiaries will receive distributions according to your wishes as spelled out in the trust document.
- Through use of a trust as IRA beneficiary, you may "stretch" IRA payments over the lifetimes of more than one generation of beneficiaries. Payments to IRA trust beneficiaries must comply with distribution rules depending on the type of IRA plan.

### What is a trust?

A trust is a legal entity that you can set up and use to hold property for the benefit of one or more individuals (the trust beneficiaries). Every trust has one or more trustees charged with the responsibility of managing the trust property and distributing trust income and/or principal to the trust beneficiaries according to the terms of the trust agreement. If the trust meets certain requirements, the beneficiaries of the trust can be treated as the designated beneficiaries of your IRA for purposes of calculating the distributions that must be taken following your death.

### Special rules apply to trusts as IRA beneficiaries

Certain special requirements must be met in order for an underlying beneficiary of a trust to qualify as a designated beneficiary of an IRA. The beneficiaries of a trust can be designated beneficiaries under the IRS distribution rules only if the following four trust requirements are

met in a timely manner:

- The trust beneficiaries must be individuals clearly identifiable from the trust document as designated beneficiaries as of September 30 following the year of the IRA owner's death.
- The trust must be valid under state law. A trust that would be valid under state law, except for the fact that the trust lacks a trust "corpus" or principal, will qualify.
- The trust must be irrevocable, or by its terms become irrevocable upon the death of the IRA owner.
- The trust document, all amendments, and the list of trust beneficiaries must be provided to the IRA custodian or plan administrator by October 31 following the year of the IRA owner's death. An exception to this rule arises when the sole trust beneficiary is the IRA owner's surviving spouse who is 10 years younger than the IRA owner, and the IRA owner wants to base lifetime required minimum distributions (RMDs) on joint and survivor life expectancy. In this case, trust documentation should be provided before lifetime RMDs begin.

**Note:** Withdrawals from tax-deferred retirement plans are taxed as ordinary income and may be subject to a 10% federal income tax penalty if withdrawn by the IRA owner prior to age 59½, with certain exceptions as outlined by the IRS.

### Disadvantages of naming a trust as IRA beneficiary

If you name your surviving spouse as the trust beneficiary of your IRA rather than naming your spouse as a direct beneficiary, certain post-death options that would otherwise be available to your spouse may be limited or unavailable. Naming your spouse as primary beneficiary of your IRA provides greater options and maximum flexibility in terms of post-death distribution planning.

Setting up a trust can be expensive, and maintaining it from year to year can be burdensome and complicated. So the cost of establishing the trust and the effort involved in properly administering the trust should be weighed against the perceived advantages of using a trust as an IRA beneficiary. In addition, if the trust is not properly drafted, you may be treated as if you died without a designated beneficiary for your IRA. That would likely shorten the payout period for required post-death distributions.

## Marriage and Money: Taking a Team Approach to Retirement

Open communication and teamwork are especially important when it comes to saving and investing for retirement.

Now that it's fairly common for families to have two wage earners, many husbands and wives are accumulating assets in separate employer-sponsored retirement accounts. In 2018, the maximum employee contribution to a 401(k) or 403(b) plan is \$18,500 (\$24,500 for those age 50 and older), and employers often match contributions up to a set percentage of salary.

But even when most of a married couple's retirement assets reside in different accounts, it's still possible to craft a unified retirement strategy. To make it work, open communication and teamwork are especially important when it comes to saving and investing for retirement.

### Retirement for two

Tax-deferred retirement accounts such as 401(k)s, 403(b)s, and IRAs can only be held in one person's name, although a spouse is typically listed as the beneficiary who would automatically inherit the account upon the original owner's death. Taxable investment accounts, on the other hand, may be held jointly.

Owning and managing separate portfolios allows each spouse to choose investments based on his or her individual risk tolerance. Some couples may prefer to maintain a high level of independence for this reason, especially if one spouse is more comfortable with market volatility than the other.

However, sharing plan information and coordinating investments might help some families build more wealth over time. For example, one spouse's workplace plan may offer a broader selection of investment options, or the offerings in one plan might be somewhat limited. With a joint strategy, both spouses agree on an appropriate asset allocation for their combined savings, and their contributions are invested in a way that takes advantage of each plan's strengths while avoiding any weaknesses.

Asset allocation is a method to help manage investment risk; it does not guarantee a profit or protect against loss.

### Spousal IRA opportunity

It can be difficult for a stay-at-home parent who is taking time out of the workforce, or anyone

who isn't an active participant in an employer-sponsored plan, to keep his or her retirement savings on track. Fortunately, a working spouse can contribute up to \$5,500 to his or her own IRA and up to \$5,500 more to a spouse's IRA (in 2018), as long as the couple's combined income exceeds both contributions and they file a joint tax return. An additional \$1,000 catch-up contribution can be made for each spouse who is age 50 or older. All other IRA eligibility rules must be met.

Contributing to the IRA of a nonworking spouse offers married couples a chance to double up on retirement savings and might also provide a larger tax deduction than contributing to a single IRA. For married couples filing jointly, the ability to deduct contributions to the IRA of an active participant in an employer-sponsored plan is phased out if their modified adjusted gross income (MAGI) is between \$101,000 and \$121,000 (in 2018). There are higher phaseout limits when the contribution is being made to the IRA of a nonparticipating spouse: MAGI between \$189,000 and \$199,000 (in 2018).

Thus, some participants in workplace plans who earn too much to deduct an IRA contribution for themselves may be able to make a deductible IRA contribution to the account of a nonparticipating spouse. You can make IRA contributions for the 2018 tax year up until April 15, 2019.

*Withdrawals from tax-deferred retirement plans are taxed as ordinary income and may be subject to a 10% federal income tax penalty if withdrawn prior to age 59½, with certain exceptions as outlined by the IRS.*

### Savings Gap

Despite career gains, women tend to retire with fewer assets than men.

## I received a large refund on my tax return this year. Should I adjust my withholding?

You must have been pleasantly surprised to find out you'd be getting a refund from the IRS — especially if it was a large sum. And while you may have considered this type of windfall a stroke of good fortune, is it really?

The IRS issued over 112 million federal income tax refunds, averaging \$2,895, for tax year 2016.<sup>1</sup> You probably wouldn't pay someone \$240 each month in order to receive \$2,900 back, without interest, at the end of a year. But that's essentially what a tax refund is — a short-term loan to the government.

Because you received a large refund on your tax return this year, you may want to reevaluate your federal income tax withholding. That way you could end up taking home more of your pay and putting it to good use.

When determining the correct withholding amount, your objective is to have just enough withheld to prevent you from having to owe a large amount of money or scramble for cash at tax time next year, or from owing a penalty for having too little withheld.

It's generally a good idea to check your withholding periodically. This is particularly important when something changes in your life; for example, if you get married, divorced, or have a child; you or your spouse change jobs; or your financial situation changes significantly.

Furthermore, the implementation of the new tax law at the beginning of 2018 means your withholding could be off more than it might be in a typical year. Employers withhold taxes from paychecks based on W-4 information and IRS withholding tables. The IRS released 2018 calculation tables reflecting the new rates and rules earlier this year. Even so, the old W-4 and worksheet you previously gave to your employer reflect deductions and credits that have changed or been eliminated under the new tax law.

The IRS has revised a useful online withholding calculator that can help you determine the appropriate amount of withholding. You still need to complete and submit a new W-4 to your employer to make any adjustments. Visit [irs.gov](https://www.irs.gov) for more information.

## What is the difference between a tax deduction and a tax credit?

Tax deductions and credits are terms often used together when talking about taxes.

While you probably know that they can lower your tax liability, you might wonder about the difference between the two.

A tax deduction reduces your taxable income, so when you calculate your tax liability, you're doing so against a lower amount. Essentially, your tax obligation is reduced by an amount equal to your deductions multiplied by your marginal tax rate. For example, if you're in the 22% tax bracket and have \$1,000 in tax deductions, your tax liability will be reduced by \$220 ( $\$1,000 \times 0.22 = \$220$ ). The reduction would be even greater if you are in a higher tax bracket.

A tax credit, on the other hand, is a dollar-for-dollar reduction of your tax liability. Generally, after you've calculated your federal taxable income and determined how much tax you owe, you subtract the amount of any tax credit for which you are eligible from your tax obligation. For example, a \$500 tax credit will reduce your tax liability by \$500, regardless of your tax bracket.

The Tax Cuts and Jobs Act, signed into law late last year, made significant changes to the individual tax landscape, including changes to several tax deductions and credits.

The legislation roughly doubled existing standard deduction amounts and repealed the deduction for personal exemptions. The higher standard deduction amounts will generally mean that fewer taxpayers will itemize deductions going forward.

The law also made changes to a number of other deductions, such as those for state and local property taxes, home mortgage interest, medical expenses, and charitable contributions.

As for tax credits, the law doubled the child tax credit from \$1,000 to \$2,000 for each qualifying child under the age of 17. In addition, it created a new \$500 nonrefundable credit available for qualifying dependents who are not qualifying children under age 17. The tax law provisions expire after 2025.

For more information on the various tax deductions and credits that are available to you, visit [irs.gov](https://www.irs.gov).
